MOLECULAR AND CELLULAR ENDOCRINOLOGY

Volume 88, Nos. 1–3 October 1992

CONTENTS

At the Cutting Edge

Melatonin binding sites: are they receptors?
D.J. Kennaway and H.M. Hugel (Australia) C1

Review

The endocrine system and mitochondrial benzodiazepine receptors
M. Gavish, S. Bar-Ami and R. Weizman (Israel) 1

Research Papers

Testosterone and 5α-dihydrotestosterone interact differently with the androgen receptor to enhance transcription of the MMTV-CAT reporter gene
J.-P. Deslypere, M. Young, J.D. Wilson and M.J. McPhaul (USA) 15

Sites of glandular kallikrein gene expression in fetal mice
J.D. Penschow and J.P. Coghlan (Australia) 23

Identification of a transcriptional enhancer upstream from the bovine thyroglobulin gene
C. Christophe-Hobertus, A. Donda, F. Javaux, G. Vassart and D. Christophe (Belgium) 31

Evidence for basic fibroblast growth factor receptors in cultured immature Leydig cells
E.P. Murono, A.L. Washburn, D.P. Goforth and N. Wu (USA) 39

Biphasic effects of exogenous ganglioside GM3 on follicle-stimulating hormone-dependent expression of luteinizing hormone receptor in cultured granulosa cells
M.-a. Hattori and R. Horiuchi (Japan) 47

The murine luteinizing hormone and follicle-stimulating hormone receptor genes: transcription initiation sites, putative promoter sequences and promoter activity
I.T. Huhtaniemi, V. Eskola, P. Pakarinen, T. Matikainen and R. Sprengel (Germany, Finland) 55

Differential regulation of anterior pituitary prodynorphin and gonadotropin-subunit gene expression by steroid hormones
A.H. Kaynard, K.G. Low and M.H. Melner (USA) 67

Growth hormone and prolactin stimulate androgen receptor, insulin-like growth factor-I (IGF-I) and IGF-I receptor levels in the prostate of immature rats
E. Reiter, P. Bonnet, B. Sente, D. Dombrowicz, J. De Leval, J. Closset and G. Hennen (Belgium) 77

Tyrosine iodination and iodotyrosyl coupling of the N-terminal thyroid hormone forming site of human thyroglobulin modulate its binding to auto- and monoclonal antibodies
B. Mallet, P.J. Lejeune, J. Ruf, M. Piechaczyk, C. Marriq and P. Carayon (France) 89

(continued on p. 190)

Cited in Biological Abstracts; Current Awareness in Biological Sciences (CABS); Current Contents./ Life Sciences; Excerpta Medica (EMBASE); Index Medicus; Informedicus; Pascal M

PRINTED IN THE NETHERLANDS

Contents (continued)

Direct estradiol down-regulation of secretogranin II and chromogranin A mRNA levels in rat pituitary cells
Y. Anouar and J. Duval (France) 97

Chloride conductance of apical membrane in cultured porcine thyroid cells activated by cyclic AMP
J.W. Armstrong, E.J. Cragoe, Jr., J.R. Bourke, G.J. Huxham and S.W. Manley (Australia, USA) 105

Somatostatin binding and modulation of adenylate cyclase in ovine retina membranes
B. Colás, A.M. Valencia, J.C. Prieto and E. Arilla (Spain) 111

Calbindin-D_{9k} gene expression during pregnancy and lactation in the rat
J. Krisinger, J.L. Dann, E.B. Jeung and P.C.K. Leung (Canada) 119

Pancreastatin increases cytosolic Ca^{2+} in insulin secreting RINm5F cells
V. Sánchez-Margalet, M. Lucas and R. Goberna (Spain) 129

Rat oocytes induced to mature by epidermal growth factor are successfully fertilized
D. Ben-Yosef, D. Galiani, N. Dekel and R. Shalgi (Israel) 135

Differential stability of mRNAs coding for α and gonadotropin β subunits in cultured rat pituitary cells
N. Bouamoud, Y. Lerrant, G. Ribot and R. Counis (France) 143

Transcriptional regulation of androgen receptor gene expression in Sertoli cells and other cell types
L.J. Blok, A.P.N. Themmen, A.H.F.M. Peters, J. Trapman, W.M. Baarends, J.W. Hoogerbrugge and J.A. Grootegoed (Netherlands) 153

Interaction of the 90-kDa heat shock protein with native and in vitro translated androgen receptor and receptor fragments
S. Marivoet, P. Van Dijck, G. Verhoeven and W. Heyns (Belgium) 165

Elements required for activation of the major promoter of the human insulin-like growth factor II gene
M.A. Van Dijk, P.E. Holthuizen and J.S. Sussenbach (Netherlands) 175

Calendar of Meetings 187

Rapid Paper

Thyroid stimulating immunoglobulins, like thyrotropin activate both the cyclic AMP and the PIP_2 cascades in CHO cells expressing the TSH receptor
J. Van Sande, C. Lejeune, M. Ludgate, D.S. Munro, G. Vassart, J.E. Dumont and J. Mockel (Belgium) R1

Notes to Authors
